About

With 5 years of experience in web development, I specialize in creating dynamic and engaging web experiences. From seamless interfaces to interactive designs, I deliver tailored solutions for diverse needs. Let's collaborate to turn your ideas into impactful digital applications.

Technical Skills

- **Programming Languages:** JavaScript, TypeScript, Python.
- **Libraries and Frameworks:** React, Next.js, Vue, Nuxt.js.
- **Markup:** Semantic HTML5, JSX.
- **UI & Styling:** CSS3, Sass, Bootstrap, Tailwind CSS, Material Design, Figma, Adobe XD.
- **No-code Tools:** WordPress, Elementor, MailChimp.
- **Bundlers & Linters:** Webpack, Parcel, ESLint, Prettier.
- **Hosting & OS:** Netlify, Vercel, cPanel, Linux (preferred), MacOS, Windows.
- **Additional:** NPM, Technical documentation, REST APIs, Responsive Web Design, Speed Optimization, SEO.

Work Experience

Founding Front-end Engineer

[GetDot.ai](#)

Jan 2023 - Present (2yrs +)

- Joined as one of the earliest frontend engineers after the launch of first product (data catalogue), contributing to the development and improvement of the second product (AI Data Assistant).
- Collaborated closely with the founding team to understand the product vision and roadmap, translating requirements into actionable frontend tasks.
- Developed new features and functionalities, such as improved data quality monitoring workflow, split data quality checks by dimension, and developing a prototype to combine table and column-level lineage, aligning with user feedback and market trends.
- Developed prototypes and mockups of new features using Figma to ensure consistent and user-friendly interfaces, maintaining brand identity and optimal user experience.
- Collaborated with cross-functional teams, including backend engineers, to integrate frontend and backend components seamlessly.
- Actively participated in sprint planning, contributing technical insights to refine user stories and prioritize development tasks.
- Shipped an improved table & column level lineage which made the product stand out among other competitors.

Front-end Engineer

[HumDov](#)

Nov 2022 - Jun 2023 (6mos)

- I collaborated with the Backend Engineers and the product design team to implement the UI designs and pull-in data to the app.
- I paid attention to the details of the product we were building and suggested corrections, changes, and improvements.
- Improved my knowledge of technologies and stayed up-to-date with the web development industry in order to deliver high-quality, production-ready code.

Bragging Rights?

- I built [Auritrack](#), a tool that helps you track your finances. I did the entire backend single-handedly with [Supabase](#) and also led the front-end. It's been 2 months since [launch date \(Dec 1st, 2024\)](#) and the tool has over 150 users already.
- Over 20 merged pull requests in 10+ open-source repositories including [Ubuntu](#) and [Signoz](#).
- I read about a [problem](#) in responsive website design and I [built a tool](#) that solves the problem.
- I organized a webinar where I taught 120 students about crypto and Blockchain. [Here is a link to the resources \(written guides and videos\) I made for the webinar](#).

Soft Skills

- Collaborative
- Communicative
- Emotional Intelligence
- Friendly Personality
- Fast Learner
- Humble, Happy, and Hungry (for knowledge, and money?)
- Passion for learning and development
- Problem-Solving
- Self-starter
- Team Leadership

Lead Front-end Engineer

[HumDov](#)

Jul 2023 - Present (2yrs)

- Led a team of up to 4 frontend developers in designing, developing, and delivering a CMS platform project.
- Architected and implemented scalable frontend solutions, enhancing the CMS performance and user experience.
- Collaborated closely with cross-functional teams, including designers, backend engineers, and product managers, to ensure seamless integration of frontend and backend components.
- Mentored and coached team members, conducting regular code reviews and providing technical guidance to foster skill growth and code quality.
- Assisted in the interviewing and hiring process, evaluating candidates' technical skills and cultural fit.
- Stayed up-to-date with emerging frontend technologies and industry best practices, applying them to drive innovation and maintain technical excellence within the team.

Web Developer

[Unlimited.ng](#)

Nov 2020 - July 2021 (9mos)

- Taught 5 students HTML, CSS, and JavaScript at a bootcamp hosted by the company.
- Built a website for the bootcamp to automate the registration process and onboarding.
- Awarded as the most punctual employee.
- Collaborated with the marketing team to source for clients via various means and also discuss with clients to know their project requirements.
- Landed the company one paid client.
- Worked on over 15 unique projects in an 9-month period.
